Sexual Assault Claim Turns out to Be False Report

May 4, 2011 |

Clarksville, TN – A 21 year old woman was charged with False Report after it was determined that an alleged Rape never occurred. On April 24th, 2011, around 9:30pm, Cassandra Lynn Shubert called Police to report that she had been grabbed while jogging along Riverside Drive and sexually assaulted in the park area beside the roadway.

This was supposed to have occurred during the time frame when heavy rains had caused flooding in the area where the alleged sexual assault took place.

The case was turned over to Detective Vince Duke who conducted a thorough

and intense investigation. Shubert provided specific and detailed information about the events that lead up to the sexual assault. She told Detective Duke she parked in a lot of a restaurant around 7:00pm, went jogging, saw people walking on the other side of the road, ran about a mile and a half, texted her husband and said her cell phone was about to die, then continued to jog, and was attacked shortly thereafter.

There was also detailed information provided about the alleged attack and suspect. As the investigation progressed, inconsistencies were noted in her allegations. It was also discovered that area identified in the attack was under water at the time.

When confronted with the information from the investigation, Shubert admitted to providing untrue facts and that a sexual assault never occurred. She had fabricated the story so her husband would not know her actual whereabouts for the time she was gone.
